

Films on Demand Integration into Brightspace/D2L

Films on Demand is a database of videos (similar to Youtube) that may now be integrated into Brightspace for students' viewing. Many of the videos are already captioned.

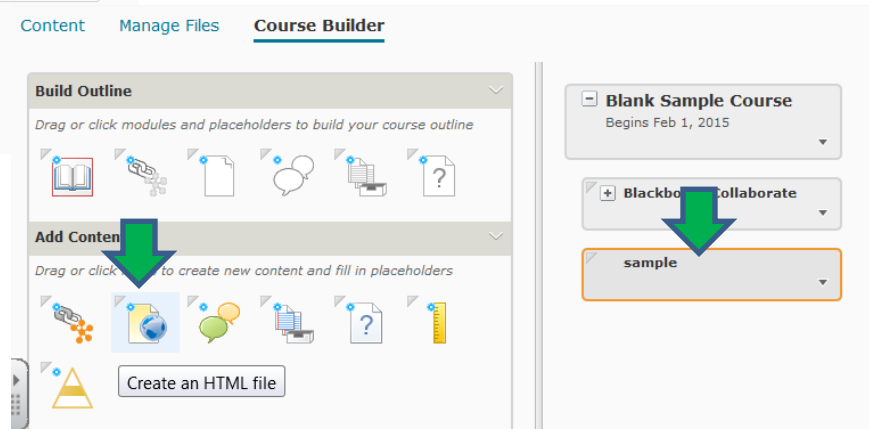

The screenshot shows the Brightspace/D2L interface for a 'Blank Sample Course'. The top navigation bar includes 'My Home', 'Email', 'Calendar', 'Maintenance', 'GALILEO', '5/12/2015', 'Help', and 'Log Out'. The course title 'Gordon State College' is displayed with a green arrow pointing to the 'Content' tab in the navigation bar. The 'Table of Contents' section is visible, showing a list of modules: 'Blackboard Collaborate' and 'sample'. A green arrow points to the 'sample' module. Below the 'sample' module, the 'Add Content' menu is open, showing options: 'Upload Files', 'Create a File', 'Create a Link', 'Add from Manage Files', 'New Checklist', 'New Discussion', 'New Dropbox', 'New Quiz', and 'New Survey'. A green arrow points to the 'Create a File' option.

Films on Demand videos may be integrated via the HTML editor in D2L. This HTML editor is apparent in several places in D2L, including the content, discussions, dropbox, and quiz area.

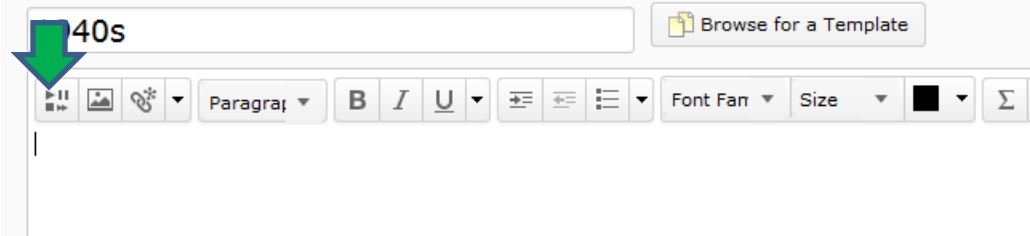

1. Within the content area ("Content" on the navbar) choose the module in which the video should be placed. Then choose "New" and "Create a File".

This can also be done via the "Course Builder" by selecting the module to be included and choosing "Create an HTML file" under "Add Content".

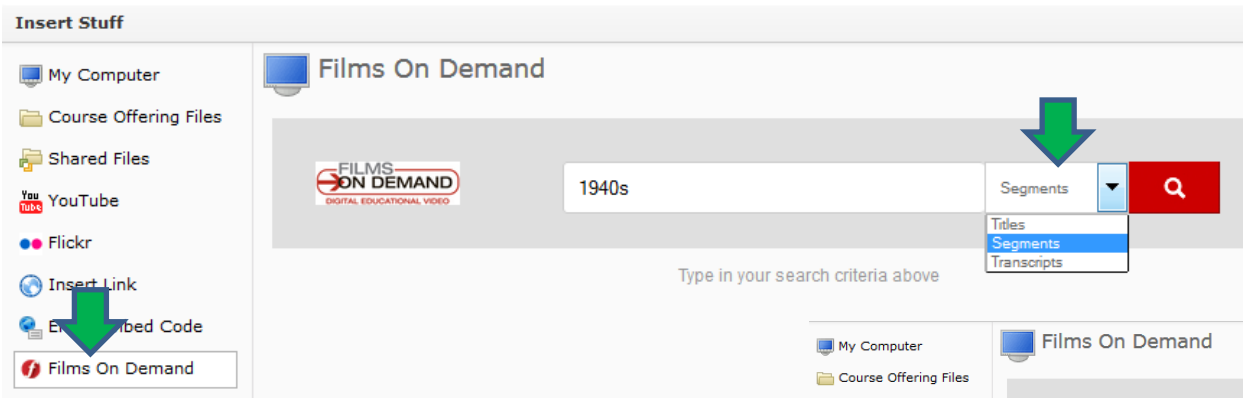

The screenshot shows the 'Course Builder' interface. The top navigation bar includes 'Content', 'Manage Files', and 'Course Builder'. The 'Build Outline' section is visible, showing a list of modules: 'Blank Sample Course' (Begins Feb 1, 2015), 'Blackboard Collaborate', and 'sample'. A green arrow points to the 'sample' module. Below the 'sample' module, the 'Add Content' menu is open, showing options: 'Create an HTML file', 'New Checklist', 'New Discussion', 'New Dropbox', 'New Quiz', and 'New Survey'. A green arrow points to the 'Create an HTML file' option.

Create a File in "sample"

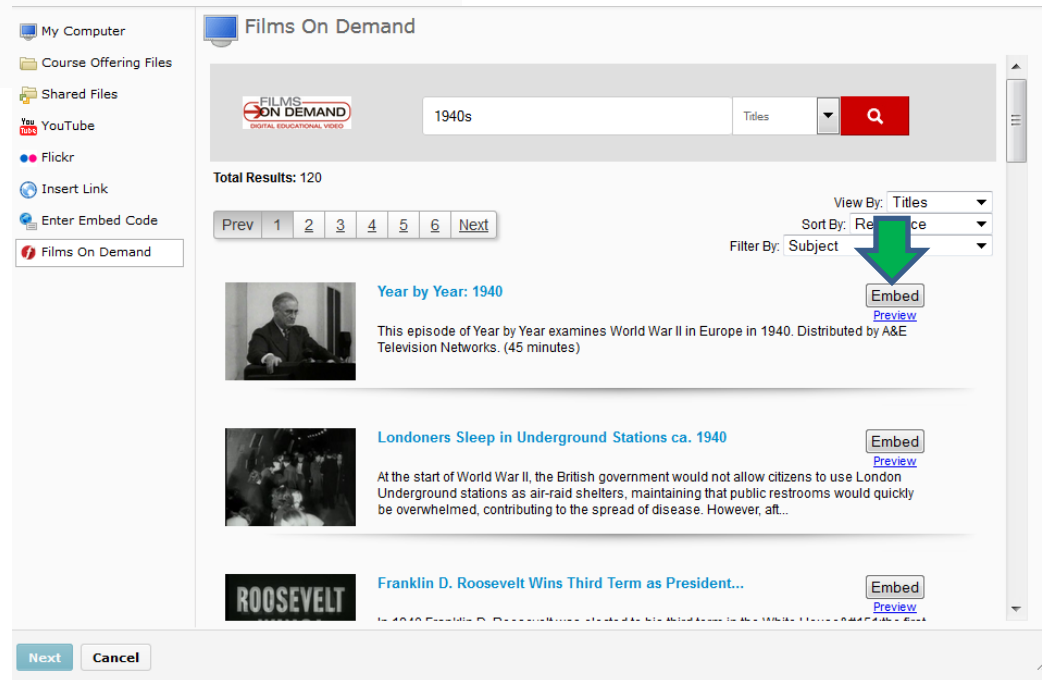

2. After creating the HTML file (giving it a name), one will select the "Insert Stuff" icon from the top menu bar (should be the first icon).

In the left panel, "Films on Demand" should be an option. One can then search by titles, segments, or transcripts for appropriate video clips to embed into their course.

3. After searching, one can select the clip by choosing "embed".

Please review this video about the 1940s.

5. As students view the video, they may choose the “CC” icon in the lower right corner and choose “On”. This will allow the closed captions to appear on the screen within the film.

6. Videos can also be added to current content pieces, discussions, dropboxes, etc., by selecting “Edit HTML” or “Edit Discussion” etc and then using the “Insert Stuff” icon to add in the videos.
