

Instructors: Reviewing, Regrading, and Editing Quiz Questions (after students have taken the quiz)

Step 1: Review the Quiz Statistics

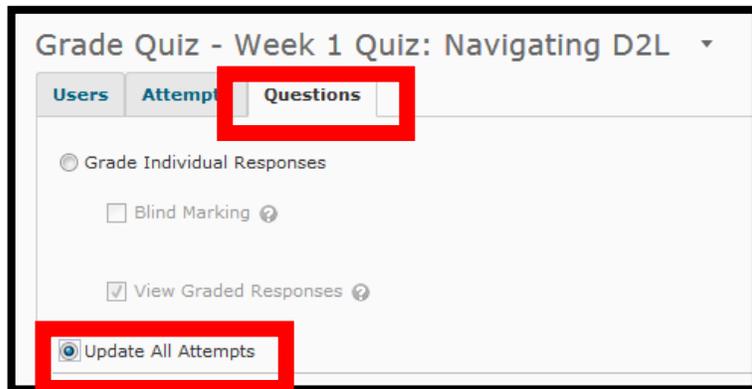

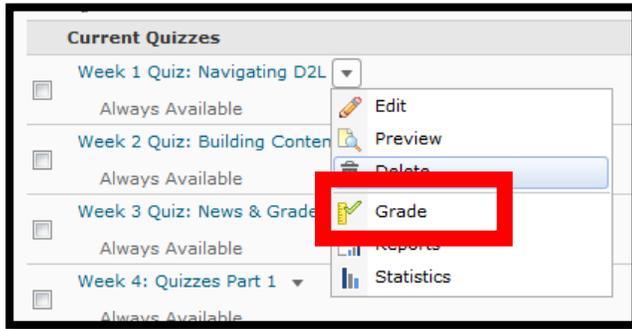

1. Go to “Quizzes” on the navbar and choose the dropdown by the name of the quiz. Choose “**Statistics**”. You can review the stats either by “**Question Stats**” or “**Question Details**” tab. Both give you the % of students who answered it correctly, but the “Question Details” lets you see how many students answered each (right or wrong).

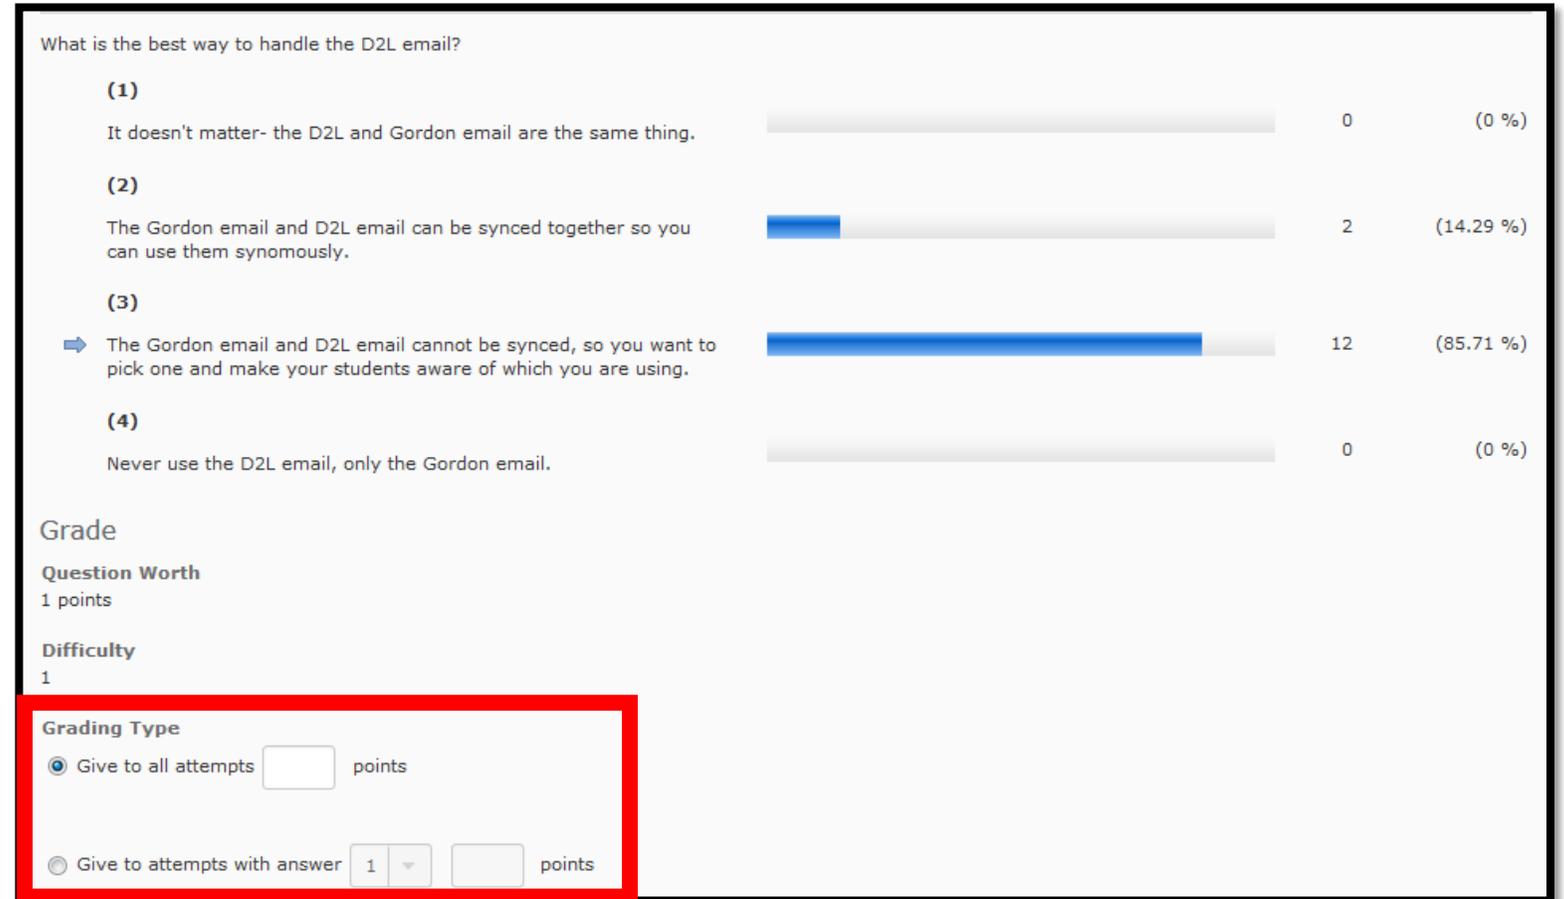

Step 2: Giving the entire class credit or giving certain responses credit

2. To “throw a question out,” you can either give everyone who answered the question the points or give students to answered a specific way the points. **Note: This only works if the student has completed an attempt. You will want to wait to do this until everyone has completed the quiz attempt.**

- From the “Quizzes” menu, choose the dropdown by the name of the quiz. Choose “**Grade**”.
- Choose “**Questions**” tab (at the top)
- Choose “**Update all Attempts**”
- Select the name of the question

Under “grading type” you can choose to update all attempts (give everyone points) or give those who answered in a certain way the points.

A screenshot of the quiz results page. The question is 'What is the best way to handle the D2L email?'. There are four answer choices, each with a progress bar, a score, and a percentage. The third choice is selected and has the highest score.

Answer Choice	Score	Percentage
(1) It doesn't matter- the D2L and Gordon email are the same thing.	0	(0 %)
(2) The Gordon email and D2L email can be synced together so you can use them synomously.	2	(14.29 %)
(3) The Gordon email and D2L email cannot be synced, so you want to pick one and make your students aware of which you are using.	12	(85.71 %)
(4) Never use the D2L email, only the Gordon email.	0	(0 %)

Modifications Log

Date: Oct 19, 2015 5:37 PM

Modified By: Autumn Schaffer

Comment:

My Bad

Action: Attempts with answer **(2)** received **1** points

When you edit the points provided, a modification log is noted at the very bottom of the page (so you can keep track).

Grading Type

Give to all attempts points

Give to attempts with answer points

If you give only a certain set of students who answered a certain way the credit, you will need to input how they answered and what points are given.

Step 3: Edit the Question

3. **DO NOT edit the question itself before you adjust the points given (in step 2).** After you have given the points, you can edit the question (to be correct for the copy over to the next shell).

-Choose “**Quizzes**” from the navbar

-Choose the dropdown by the name of the question. Choose “**Edit**”.

-Select “**Add/Edit Questions**” and then select the question. You will then be able to edit the question and responses to take effect the next time you use the exam (when you copy it over to another course).
