Quick Fact Objects

The Quick Fact Objects below are displayed to provide aggregated information for the selected population. Each object's display is composed of a horizontal bar graph displaying the unduplicated Headcount of several categories within that object. For example, the *By Age* object displays information for 5 distinct age groups. At the far right of each element bar, there is a numeric indicator for the percent of the object total for that element. Also within each bar is a vertical solid line which indicates the number of FTEs for that element.
