

GALILEO Tutorial Quiz

1-6-2009

Answer the following questions using the tutorial called “What is GALILEO?” available at http://www.usg.edu/galileo/skills/unit05/galileo05_01.phtml. Use the **next** button at the top of the screen to move through the tutorial.

1. GIL tells you what? It tells you what books and periodicals your library owns.
2. GALILEO tells you what? It tells you what articles are published within those periodicals.
3. GALILEO is accessible via the web from the following URL: <http://www.galileo.usg.edu>.
4. GALILEO's database section allows you to search what? Name three things.

Magazines, Newspapers, Scholarly Journals, Book Chapters, Conference Papers, Book Reviews, TV and Radio Transcripts, Encyclopedias, Business Directories and Government Publications

5. To search a specific database, click on Databases A-Z.
6. The “more >>” at the end of a database name links to a screen when you click on it. What type of information does it give you? It gives more detailed information about the database.
7. What do a citation and a citation with abstracts include? A citation contains the following information: Title of periodical in which article published, author of article, title of article, volume, number and date of issue. A citation with an abstract contains the above information plus a short paragraph describing the article.
8. What should you use when constructing a search, besides your keywords or search terms? Use truncation or Boolean operators to construct your search.
9. Sometimes the full text of an article is not available in a database, what three places would you look to find the article and what are they?
Journals A-Z in GALILEO,
Your local library,
GALILEO database Georgia Libraries Journal List.
10. Where do you go to find out your GALILEO password? Go to GIL and click on Access my GIL Account to: Get GALILEO Password.
